Babelscape

multilinguality at your fingertips

Babelscape® is a tech company committed to providing strong innovation in AI at the intersection of multilingual Natural Language Processing, **knowledge graphs** and text analytics.

We **overcome language barriers** by enabling the **automatic processing of text independently of the input language**, and distilling and aggregating the information extracted across languages by means of a unified large-scale multilingual knowledge repository and **semantically-enhanced text comprehension systems**.
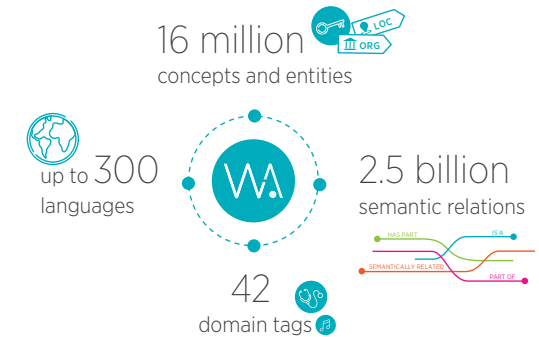

For more details visit our website **babelscape.com**.

WordAtlas®
The next-generation multilingual knowledge graph

Enable semantic Natural Language Understanding tasks with our **multilingual knowledge graph**. WordAtlas® includes **professionally-curated contents**, and provides **millions of lexicalizations** for each language.

16 million concepts and entities

up to 300 languages

2.5 billion semantic relations

42 domain tags

NLP Pipeline
Process text in dozens of languages!

Enable large-scale processing of text in many languages. Our NLP Pipeline includes modules like **language recognition**, **tokenization**, **morphological analysis**, **POS tagging**, **NER**, and many more, which can be accessed separately and are integrated into the pipeline.

Comprehendo®
### Disambiguate and understand text in hundreds of languages

Comprehendo® performs large-scale, wide-coverage **disambiguation and entity linking**, by associating the most suitable **meanings** with words and phrases occurring within text in arbitrary languages.

e.g. "SPRING"

- Spring season • Natural spring
- **Elastic device**
- Spring framework
- Spring, a place in Texas
- American Spring (band)

Extraggo®
Get the gist of your text

With **Extraggo®** you can distill and **organize knowledge** from a text. Thanks to its seamless combination of statistical and semantic techniques, **Extraggo®** allows you to **get meaningful insights out of text**, independently of the language used in the input data.
myKnowledgeGraph
Organize your enterprise knowledge!

Create your enterprise knowledge graph from **term banks**, **document bases** or documents containing **raw text** and enable **semantic search** to easily visualize and navigate your data!

TraDeInterpret
Interpret your trademark!

TraDeInterpret performs **intra-word morphological analysis of denominations**, infers the **semantics** hidden in a trademark and extracts **concepts and their definitions across languages**.
